EDUCATION

BSc. Computer Science, [Unity University](#) 📄

Sep 2024 – Jun 2028 | Addis Ababa, Ethiopia

- **Relevant Coursework:** Data Structures & Algorithms, Web development, Database Management System, Object-Oriented Programming.

PROJECTS

Free Spot – Class Tracker (In Progress), Fullstack Developer 📄

Mar 2026 – Present

- Currently building a web application that helps students find free classrooms in real time.
- The system shows which rooms are occupied, along with details like department and instructor, and includes features like schedule visualization and filtering.
- I'm also working on adding an interactive campus map to make navigation easier for new students.
- Tech: **React, Node.js, Express, MySQL**
- Project is currently in progress; updates available on [GitHub](#)

Shemachoch Smart Reservation System, Fullstack Developer 📄

Nov 2025 – Jan 2026

- Worked on a full-stack web application that allows users to reserve goods online, with separate roles for admins and customers.
- The system includes authentication, product reservation, and options for delivery or pickup, along with an admin dashboard for managing operations.
- Tech: **JavaScript, PHP, MySQL**

Admin Panel for Local Client – Freelance / Personal Project

May 2025 – Jul 2025

- Built a secure admin panel for a small business to manage daily operations. This included features for handling users, tracking stock, managing orders, and calculating payroll.
- The system helped organize data and made it easier for the business to manage its workflow.
- Tech: **JavaScript, PHP, MySQL**
- Project is private due to client confidentiality

Ahadu Gebeya, Front-End Developer 📄

Jan 2024 – Mar 2024

- Developed a responsive website for a local e-commerce business to showcase their services and provide contact information.
- The site includes multiple pages, smooth navigation, and a working contact form.
- Tech: **HTML, CSS, JavaScript**

SKILLS

Programming Language — JavaScript, Java, C++, PHP, MySQL

Framework & Libraries — React.js, Node.js, Express, Bootstrap

Tools — Postman, Git, Figma

CERTIFICATES

JavaScript: The Hard Parts, v2 – Frontend Masters

Issued Sep 2025

- Deep dive into JavaScript, focusing on closures, prototypes, asynchronous programming, and advanced patterns.

Artificial Intelligence Fundamentals – Udacity

Issued Sep 2025

- Learned the basics of AI, including machine learning concepts, algorithms, and practical applications

Introduction to Web Development - OmniTech Consultancy PLC

Issued May 2019

Gained foundational web development skills including HTML, CSS, JavaScript, and building basic web applications.
